Laboratory Director's Notes

Laboratory test values flagged with an asterisk (*) within this report refer to the following commentary from our physicians and quality assurance staff. Please feel free to call us at 800 338 4333 with questions you may have regarding this information.

SAMPLE ID	PATIENT COLLECTION DATE	ITEM	RELATED NOTES
S999999	07/10/2009	Pr/Cr	Since urine total protein concentration is below the detectable limit of the assay, the Total Protein: Creatinine Ratio cannot be calculated.

Mitchell S. Laks, Ph.D.
 Laboratory Director

Disclaimer: Litholink's computer generated "treatment suggestions" and "follow-up suggestions" are based upon the patient's most recent laboratory results and, where available, past laboratory results or additional information provided by the treating physician. The comments are intended solely for use as a helpful guide to the treating physician. Litholink does not have a doctor-patient relationship with the individuals for whom tests are ordered, nor does it have access to a complete medical history. The treating physician should not rely solely on this guidance in making diagnostic or treatment decisions. The treating physician should also consider other factors, such as a patient's complete medical history and physical examination. This program is intended for patients who have been diagnosed with Chronic Kidney Disease stages 3, 4, and pre-dialysis 5. This program is not intended for children or transplant patients. The medical bases for the suggestions are the guidelines created by the National Kidney Foundation Kidney Disease Outcomes Quality Initiative (KDOQI[™]). In certain situations a national expert advisory panel assembled by Litholink has provided the treatment suggestions. The KDOQI[™] guidelines, with its limitations and disclaimers, are at www.Kidney.org/professionals/KDOQI. The members of Litholink's national advisory panel are listed at www.Litholink.com.
